

LAYAN SABHA

DEVOPS ENGINEER

Amman, Jordan | +962 79 869 1559 | layan.h.sabha@gmail.com

linkedin.com/in/layan-sabha | layansabha.github.io | github.com/Layansabha

TECHNICAL SKILLS

CI/CD & Version Control: Jenkins, GitHub Actions, GitLab CI/CD, Git, GitHub, GitLab, YAML

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Helm, GHCR

Systems & Networking: Windows Server, Active Directory, IIS, Linux (Ubuntu, Oracle Linux), NGINX, DNS, DHCP, TCP/IP, routing, firewalls, VPN, TLS/SSL, SSH

Virtualization: VMware, VirtualBox, Hyper-V

Observability & Security: Prometheus, Grafana, Alertmanager, Trivy, SonarQube, OWASP ZAP

Scripting & Data: Python, Bash, SQL

Cloud & IaC Familiarity: AWS, Terraform, Ansible

PROFESSIONAL EXPERIENCE

Infrastructure Engineer Trainee | Azm Digital | Amman, Jordan **Jul 2026 - Present**

- Configured **Windows Server environments**, including **Active Directory and Group Policy**; DNS, DHCP, domain joining, file permissions, IIS, backups, and TLS certificates.
- Troubleshoot **routing, firewall, DNS, DHCP, and VPN** scenarios by isolating faults and validating connectivity across each network layer.
- Deployed a website on **Windows IIS**, configured **HTTPS**, and published it externally through the company router using **NAT/port forwarding**.
- Prepared and delivered a **technical presentation on website certificates and HTTPS trust**, including certificate validation.

DevOps Trainee | Digitinary **Mar 2025 - May 2025**

- Built a **Jenkins pipeline** that automated build, testing, **SonarQube quality gates** and **Trivy security scans** for a multi-service application.
- Wrote **multi-stage Dockerfiles** and **Docker Compose** configurations for repeatable local and Ubuntu VM environments, including service networking and persistent storage.
- Deployed workloads to **Kubernetes** and packaged releases with **Helm** using Deployments, Services, Ingress, ConfigMaps, Secrets, Namespaces, and persistent volumes in hands-on tasks.

Cybersecurity Intern | Estarta Solutions **Jul 2024 - Sep 2024**

- Conducted **authorized web and network security assessments** using Burp Suite, OWASP ZAP, Nmap, Nessus, SQLMap, and Wireshark; manually validated findings and prioritized risk using **CVSS**.
- Documented findings, evidence, severity, and **remediation guidance** in structured assessment reports.

SELECTED PROJECTS

Data Center Environmental Monitoring & Observability System | Portfolio Project **2026**

- Programmed an **ESP32 in Arduino C++** to read AHT20/BMP280 temperature and humidity data and expose device health and sensor readings at an **HTTP /metrics endpoint** in Prometheus format.
- Containerized **Prometheus, Grafana, and Alertmanager** with Docker Compose; built **live and historical dashboards** and alerts for high temperature, abnormal humidity, and an unavailable device, routed to a mobile notification.
- Integrated an **LCD, RGB LED, and buzzer** for local status and threshold warnings alongside the remote monitoring and alerting flow.

DOM-XSS Detection & DevSecOps Platform | [GitHub Repository](#) **2024 - 2026**

- Built a **Python/FastAPI scanning pipeline** with Redis/RQ workers, Chromium-based JavaScript collection, AST feature extraction, LightGBM triage, and optional OWASP ZAP verification; achieved **96.19% accuracy and 99.87% precision**.
- Implemented **9 GitHub Actions checks** across quality, testing, security, and infrastructure; scanned containers with **Trivy** and published **GHCR images with SBOM and provenance metadata**.
- Added **Terraform** configuration to provision a firewall-protected **Hetzner Cloud VPS** with cloud-init and automated Docker/Docker Compose installation.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Cybersecurity | The Hashemite University **2021 - 2025**

Cisco Certified Network Associate (CCNA) | Valid Aug 2025 - Aug 2028

CompTIA Coursework: A+ (completed Sep 2026) | Security+ (completed 2022)

Languages: Arabic (Native) | English (Professional Working Proficiency)
