PROFESSIONAL SUMMARY

Hands on and self directed cybersecurity graduate who enjoys understanding how systems work, solving technical problems, and taking projects from initial setup through deployment and ongoing support. Experience spans DevOps, application operations, and security, with practical exposure to Linux, CI/CD, Docker, monitoring, troubleshooting, and vulnerability assessment. Brings a curious, persistent, and practical approach to unfamiliar technical challenges.

CORE SKILLS

DevOps & Infrastructure: Linux, Git, GitLab CI, Jenkins, CI/CD, Docker, Kubernetes, Terraform, Grafana.

Monitoring & Security: Monitoring and logging, SonarQube, Trivy, vulnerability assessment, secure SDLC, ISO 27001 support.

Systems & Scripting: Bash, YAML, SQL, REST APIs, server configuration, deployment, maintenance, troubleshooting.

Networking Fundamentals: TCP/IP, DNS, HTTP/HTTPS, routing and switching.

Languages: Arabic, English.

EDUCATION

Bachelor of Cyber Security | Hashemite University 2021 – 2025

EXPERIENCE

Full-Stack Developer | Family Medicine Clinic - Abdali Hospital Dec 2025 - Apr 2026

- Designed, deployed, and maintained an internal clinical web application, managing the application lifecycle from development through production support.
- Configured and maintained the hosting environment, handled deployments, and troubleshoot application and server issues.
- Implemented role-based access workflows and REST API handling for bilingual Arabic and English clinical data while maintaining patient data confidentiality.

DevOps Intern | Digitinary Mar 2025 - Apr 2025

- Supported CI/CD workflows by containerizing services with Docker and working with Kubernetes-based environments.
- Applied Grafana monitoring and logging practices to improve visibility into application performance and infrastructure events.
- Integrated SonarQube and Trivy into automated CI/CD checks for code quality and container security.

Cyber Security Intern | Estarta Solutions Jul 2024 - Sep 2024

- Conducted penetration testing and vulnerability assessments across web environments and documented identified findings.
- Produced security assessment reports and supported ISO 27001 audit and compliance documentation.
- Tracked identified security findings through remediation and follow-up.

Network Engineer Intern | PSUT x Cisco Aug 2022 - Nov 2022

- Configured and troubleshoot Cisco routers and switches across lab topologies.
- Implemented OSPF, RIP, STP, and VLANs and used structured troubleshooting to isolate faults.

PROJECTS

TRIO - AI-Based DOM XSS Detection | 2025

- Built an automated machine-learning pipeline for DOM XSS detection, training and evaluating six models and integrating the selected model into a functional web-based system.
- Automated data processing, testing, and validation workflows to support repeatable model evaluation.

Amanak - Government Cybercrime Reporting Application | 2024

- Developed a cybercrime reporting application with a Spring Boot backend, Android XML mobile app, administrative dashboard, and backend APIs.
- Used a mock government dataset to simulate public-sector integration and end-to-end reporting workflows.

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) | Cisco | Aug 2025 - Aug 2028 | Cisco ID: CSC014967361
- Certificate verification: 108947f0d09a494d8500df4a34862d45
- CompTIA Security+ | 2023
